Showing 1 to 5 of 5 entries Previous 1 Next

The page where the system admin manages the list of system users.

## SOFTWARE ENGINEERING DEPARTMENT

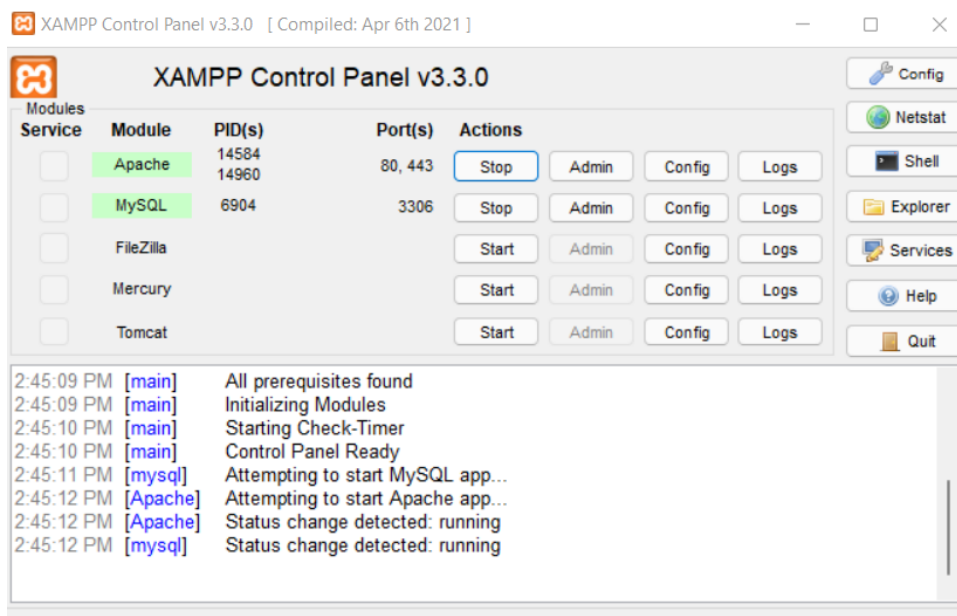

### System Setting:

The page where the system admin manages the system information.

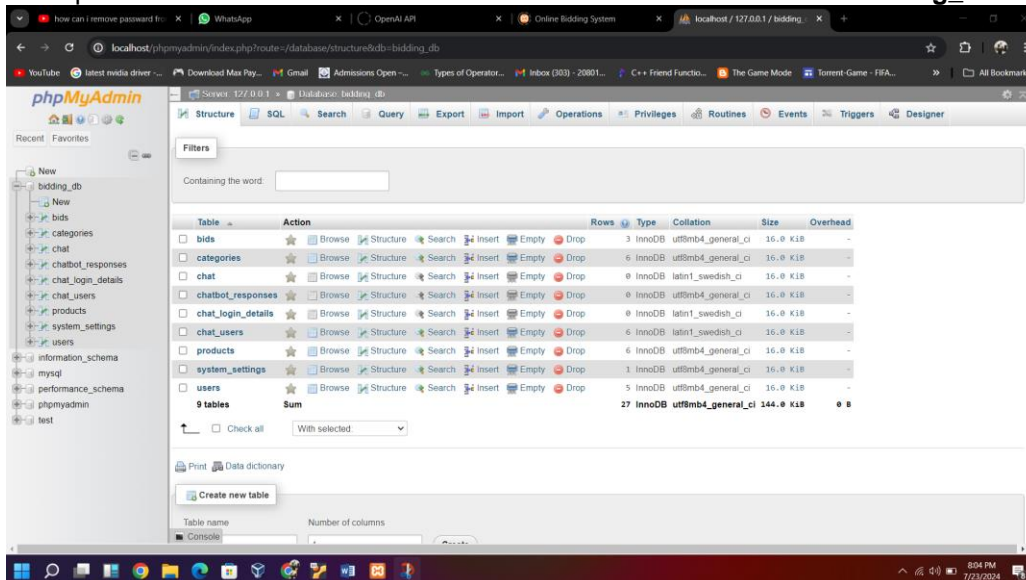

### HOW TO RUN:

#### 1. SETUP ANY WEB SERVER THAT RUN PHP:

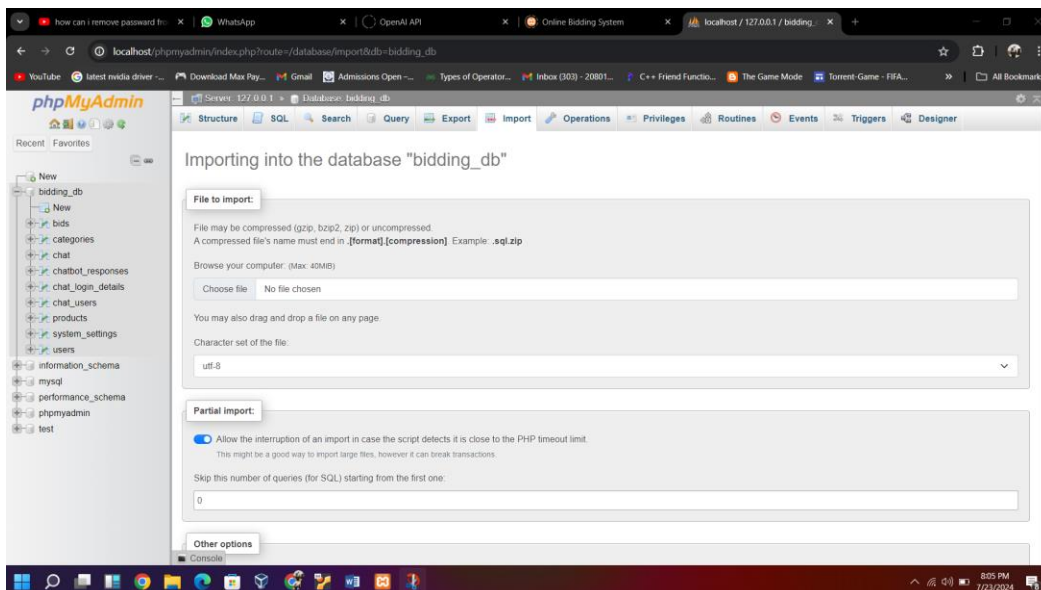

**SOFTWARE ENGINEERING DEPARTMENT**

2. Open the web-server database and create a new database name it **bidding\_db**:

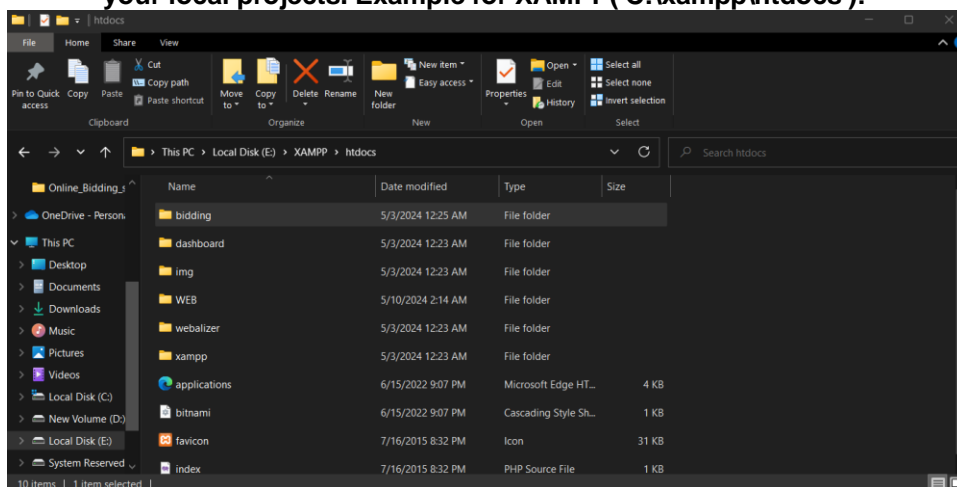

Open PHPmyAdmin and here make bidding\_db name database

Import the database files which are in code Folder name 'db'.

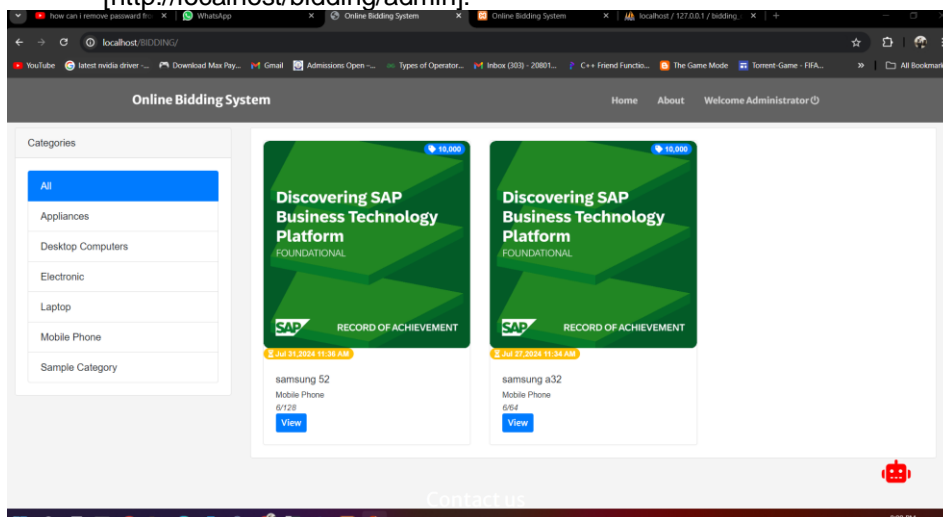

## SOFTWARE ENGINEERING DEPARTMENT

- Copy and paste the source code to the location where your local web server accessing your local projects. Example for XAMPP('C:\xampp\htdocs'):

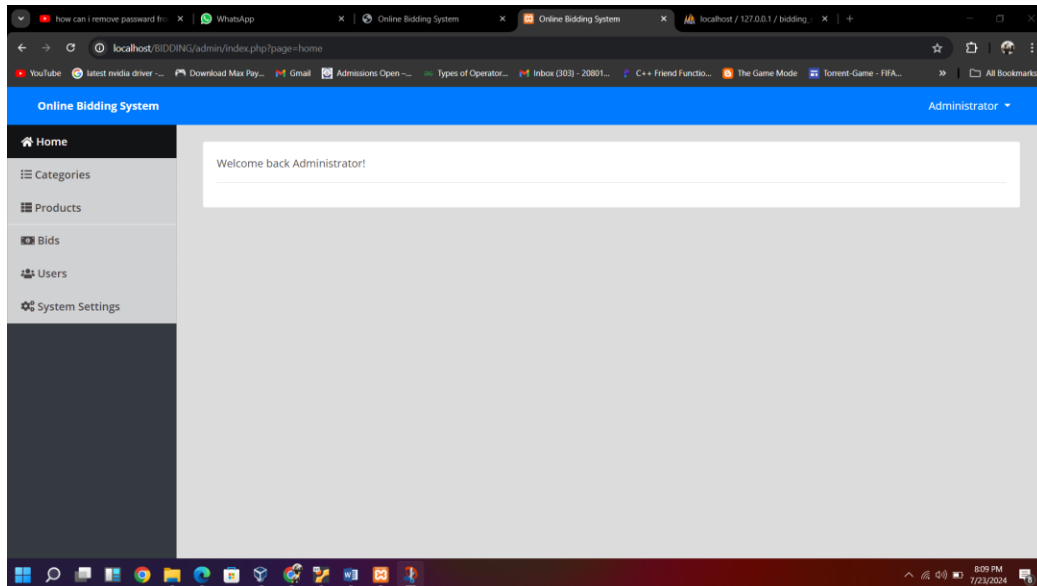

Copy and paste the code to the xampp in htdocs folder.

- Open a web browser and browse the project. E.g [http://localhost/bidding] for the website and [http://localhost/bidding/admin]:

Now here the application will run by write “localhost/bidding/home.php” the user page will run properly.

## SOFTWARE ENGINEERING DEPARTMENT

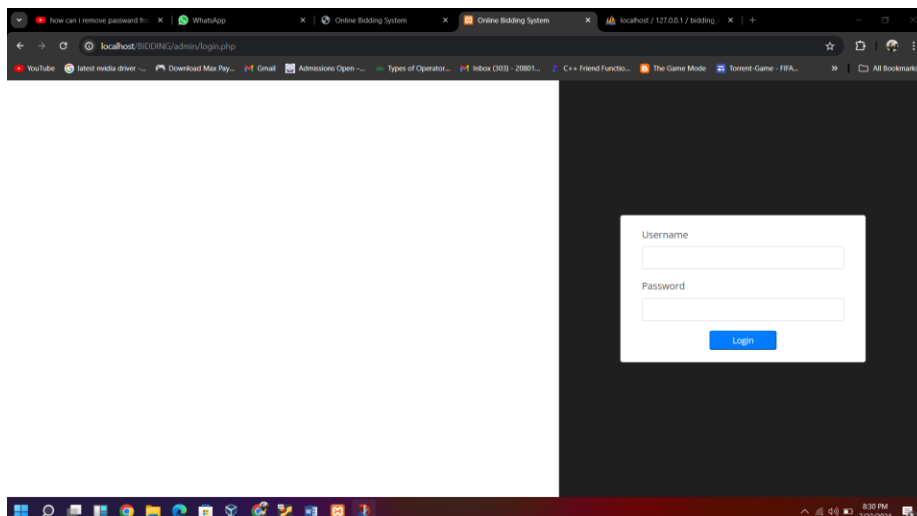

Here the admin page will run properly by writing  
“localhost/bidding/admin/login.php”.

### ADMIN DEFAULT PASSWORD:

Username: admin

Password: admin123

Here just give default username as “admin” and password “admin123”.
